# SUBJECT INDEX

<i>Aspergillus flavus</i>	food compatibilities, 257
gamma irradiation—recycling of, 5	measurement of meat quality, 153, 158
almonds	milk gels, differential thermal analysis, 226
vitamin B <sub>6</sub> retention in, 244	potato granules, differential thermal analyses, 219
amino acid	retail frozen fishery products, 185
availability in legume and legume wheat blends, 31	soft undesirable solids in minced lobster meat, 191
composition of truffle, 221	standardization of automatic milko-testers, 19
development of proline in green pork bellies, 97	ascorbic acid
distribution in various protein fractions, 326	determination in foods by polarography, 215
analysis	light-induced degradation of, 61
ascorbic and erythorbic acids in foods, 215	peaches, content in, 233
	potatoes, content in, 138

- aspartame
  - taste intensity, pleasantness and quality of, 126
- beef
  - muscle, sensitivity to electrical stimulation, 280
- buckwheat
  - production of a protein-rich fraction from, 236
- cabbage
  - precooling study, 265
- carbon dioxide
  - egression from potato tubers, 132
- carotene
  - light-induced decomposition of, 56
- cereal
  - breakfast, sugar content of, 134
- cheese
  - cheddar, manufacture with bovine pepsin, 78
  - whey proteins, coprecipitation of, 43
- chicory
  - fructose content of, 331
- collagen
  - major physical properties of, 69
- conductivity
  - thermal, of liquid-liquid emulsions, 49
- dill seed
  - essential oil from, 208
- emulsions
  - meat, deboned poultry meat in, 147
  - meat, textural characteristics of, 88
  - standardization of milko-testers, 19
  - thermal conductivity of, 49
- enzymes
  - alcohol dehydrogenase in fusel alcohol formation, 27
  - bovine pepsin for cheddar cheese manufacture, 78
  - keto acid decarboxylase in fusel alcohol formation, 27
- essential oils
  - dill seed, 208
  - peppermint, 247
  - sage, 201
- ethephon
  - effect on ascorbic acid of peaches, 233
- fababeans
  - flavor of, 181
- fatty acids
  - oyster, effect of storage on, 40
- fish
  - flatfish, protein instability in, 143
  - frozen products, proximate and mineral composition of, 185
- flavor
  - fababean, effect of heat and storage on, 181
- flour
  - rapeseed, in wieners, 9
- fruit
  - peaches, ascorbic acid in, 233
  - pressure tests, operational aspects of, 307
- gibberellic acid
  - effect on ascorbic acid content of peaches, 233
- gluten
  - wheat, ultrastructure and rheology of, 109
  - whey proteins, isolation and properties of, 100
- hydrogenation
  - mass transfer coefficients in, 53
- Lactobacillus acidophilus*
  - utilization of sugars, 197
- legumes
  - availability of amino acids in, 31
- light
  - effect on ascorbic acid decomposition, 65
  - effect on riboflavin decomposition, 61
  - effect on vitamin A in solutions and milk fat, 56
- lipids
  - oyster, effect of storage on, 40
- lobster
  - meat, soft undesirable solids in, 191
- maple syrup
  - sugar content of, 333
- meat
  - emulsions, deboned poultry meat in, 147
  - emulsions, textural characteristics of, 88
  - formation of N-nitrosohydroxypyrrolidine in, 36
  - free proline in pork bellies, 97
  - ground, *Salmonellae* in, 223
  - quality, measurement of, 153, 158
  - rapeseed supplemented wieners, 9
  - sensitivity of beef muscle to electrical stimulation, 280
  - tenderness, measurement of, 307
- menu
  - production by computer, 257
- milk
  - fats, vitamin A and B-carotene in, 56
  - gels, differential thermal analysis, 226
  - skim, *Salmonella* in, 320
  - standardization of automatic testers, 19
- nitrite
  - formation of N-nitrosohydroxypyrrolidine in cured meats, 36
- nitrosamines
  - N-nitrosohydroxypyrrolidine in cured meats, 36
  - proline as a precursor of N-nitrosamines, 97
- oil
  - hydrogenation, mass transfer coefficients in, 53
  - rapessed, aqueous extraction of, 239
  - rapeseed, pathogenicity studies of, 23
- oysters
  - effect of storage on lipids of, 40
- pea
  - protein supplementation, 1
- peach
  - ascorbic acid and ascorbic acid oxidase in, 233
- peppermint
  - essential oils from, 247
- pork
  - bellies, development of free proline in, 97

- potato
  - carbon dioxide egression from, 132
  - differential thermal analyses of granules, 219
  - granules, pyrazine retention in, 271
  - microstructure of, 295
  - tubers, organic acids in, 13
  - vitamin C in, 138
- protein
  - buckwheat, production of, 236
  - cheese whey, coprecipitation of, 43
  - fractionation, from different sources, 326
  - gluten whey, isolation and properties of, 100
  - instability, minced muscle of flatfish, 143
  - meat, effect on textural characteristics of emulsions, 88
  - pea, supplementation of, 1
  - rapeseed, coprecipitation of, 43
  - rapeseed, preparation of colourless abstracts, 79
  - soybean, sedimentation coefficients of, 169
  - sunflower, utilization in milk-like beverages, 229
  - truffle, amino-acid composition of, 221
  - whey, influence of psychrotrophs on, 269
- pyrazine
  - retention during production of potato granules, 272
- rapeseed
  - oil, aqueous extraction of, 239
  - oil, feeding experiments with rats, 23
  - proteins, coprecipitation of, 43
  - proteins, preparation of colourless extracts, 73
  - supplementation of wieners, 9
- riboflavin
  - light-induced degradation of, 65
- sage
  - essential oils from, 201
- Salmonella*
  - detection in skim milk, 320
  - in vacuum-packaged ground meat, 223
- sensory analysis
  - meat tenderness, relationship with instrumental measurements, 307
  - optimization of product formulation, 161
  - taste intensity of aspartame and sugars, 126
- soybean
  - fermented product, production of, 197
  - protein, sedimentation coefficients of, 169, 176
- starch
  - pilot plant viscometer, 120
- stillage
  - rum, anaerobic digestion of, 105
- sugar
  - content of Canadian breakfast cereals, 134
  - content in maple syrup, 333
  - fructose and glucose content of chicory, 331
  - taste intensity, pleasantness and quality of, 126
- sunflower
  - protein, utilization in milk-like beverages, 229
- taste,
  - aspartame, sugars and their mixtures, 126
- texture
  - meat emulsions, textural characteristics of, 88
  - microstructure of raw and granulated potatoes, 295
  - pilot plant starch viscometer, 120
  - prepeeled rutabaga, 85
  - rehydrated commercial wheat gluten, 109
- tomato
  - paste foams, characterization and drying of, 313
  - quality of paste, reconstituted juice and sauce, 92
- truffle
  - protein and amino acid composition of, 221
- vitamins
  - decomposition of ascorbic acid in solution, 65
  - decomposition of riboflavin in solution, 61
  - determination of ascorbic acid by polarography, 215
  - effect of light on vitamin A decomposition, 56
  - vitamin B<sub>6</sub> retention in almonds, 244
  - vitamin C in potatoes, 138
- whey
  - influence of psychrotrophs on protein content, 269
- wiener
  - supplementation with rapeseed, 9

## ADVERTISER INDEX

Ciba-Geigy Biotechnical  
Products A3, A5, A28, A39, A63, A66

Firmenich of Canada A63

Florasynth Canada Ltd. A90

Food Products Limited OC(1), OC(2)

Fries and Fries, Canada A24, A39, A91

Fritzsche Dodge and Olcott  
(Canada) Ltd. IC(1), IC(2), IC(3), IC(4)

Givaudan Limited A4, A27

Griffiths Laboratories  
Limited A24(1), A28, A41(1), A59, A92

International Development Research Centre A21

International Flavors and Fragrances  
Canada Ltd. A22, A25, A44, A62

International Grain Products Limited A21

Nacan Products Ltd. A40-41, A64-65

Pemberton and Co., Ltd. A3, A5

Pfizer Company Ltd. A23, A29, A60, A93

Stange Canada Ltd. A1, A25(1), A42, A61
